Belgrade, Serbia | Open to fully remote roles across EMEA time zones

Project / Delivery Manager | Enterprise and Government Systems | Vendor Management | International Tenders

Professional Summary

Project and delivery manager with 13 years of experience running complex, multi-stakeholder programmes in two demanding environments: national government IT systems and international B2G export deals. Delivers end to end through external vendors, owning requirements, contracts, schedule, acceptance and escalations, and acts as the single point of contact between a demanding client and the team that has to deliver. Works in English with client executives, including central bank and ministry leadership.

- Delivered three government IT products for the Ministry of Finance through subcontractor teams of 5 to 10 people, over 9 to 10 month cycles, with every deliverable accepted with zero revision cycles and all milestones met.
- Built an in-house enablement unit from scratch, replacing an external vendor: 61 training assets year to date, 40,000 unique users and 92,000 course views on the internal learning portal, and approximately RUB 10M/ $120k saved in six months against a RUB 27M/ $324k vendor contract.
- Beat contractual SLAs consistently: 2.5 working days average for content updates against a 5-day SLA, and 5 days for new materials against a 10-day SLA.
- Managed a portfolio of export contracts worth over EUR 70M across 11 countries with zero missed delivery deadlines in 6.5 years, and won approximately 50% of 20+ international tenders for central banks, interior ministries and state printing works.

Professional Experience

Acting Head of Department, Enablement and Competence Development

Goznak, Centre for Information Technologies "Gosfinansy", Moscow | August 2025 to October 2026

The IT arm of Goznak, developing and supporting "Electronic Budget", the national public finance platform used by all federal ministries and agencies, with over 500,000 users. Client: the Ministry of Finance.

- Lead a unit of 3 specialists across three streams: user enablement content, university and internship partnerships, and continuing professional education programmes. Report to the branch director and to the advisor to the CEO.
- Own the enablement content pipeline end to end: intake of requests from platform owners, conversion of 300-page user manuals into concise step-by-step guides, quality control and delivery against contractual SLAs.
- Close government contract stages, prepare management reporting, status briefings and executive presentations.
- Deliver masterclasses on the platform, business analysis and BPMN for students and interns.

Key achievements

- Transferred production of user training content from an external vendor to an in-house team, reducing spend by approximately RUB 10M over six months against a RUB 27M vendor contract at the same volume of work.
- Delivered 61 training assets year to date for new platform releases; the learning portal reached 40,000 unique users and 92,000 course views.
- Outperformed contractual delivery SLAs by roughly 2x: 2.5 days average for updates against a 5-day requirement and 5 days for new materials against 10 days.
- Presented the unit's annual results to an internal audience of approximately 200 people.

Lead Business Analyst / Project Manager

Goznak, Centre for Information Technologies "Gosfinansy", Moscow | February 2024 to August 2025

The IT arm of Goznak, developing and supporting "Electronic Budget", the national public finance platform used by all federal ministries and agencies, with over 500,000 users. Client: the Ministry of Finance.

- Acted as delivery lead and single point of contact between the government client and subcontractor teams building analytics and monitoring products on the national public finance platform.
- Gathered requirements from the client, analysed legacy systems, rewrote technical specifications with vendor analysts and validated delivered functionality.
- Ran regular vendor check-ins, managed escalations and client expectations when delivery was at risk, and mediated between client and vendor on scope and timelines.
- Reported progress to department directors on the client side and to management internally.

Key achievements

- Delivered two analytics modules over the capital investment and public debt subsystems of the national public finance platform: 9-month cycle, Waterfall, 10-person subcontractor team. Modules now serve approximately 200 and 50 users respectively.
- Delivered MF-Monitoring, the Ministry of Finance internal milestone-tracking system used by project offices and by the Minister of Finance: 10-month cycle, 5-person subcontractor team, up to 150 users. Defended the design and solution with the Director of the IT Department before full implementation.
- Formally recognised by the Director of the IT Department of the Ministry of Finance (2024) for contribution to the development of state information systems, and by the Director of the Centre (2025).

Senior Specialist, Export Directorate

Goznak, Moscow | July 2017 to January 2024

- Owned the full export cycle for assigned markets: tender screening with regional agents, bid preparation and submission, negotiation, contracting, production coordination and delivery.
- Coordinated production across paper mills, printing works and mints, escalating directly to chief technologists, workshop heads and plant directors when timelines were at risk.
- Negotiated in English with central bank representatives, senior ministry officials and plant directors on commercial, technical, production and logistics terms.

Key achievements

- Managed a portfolio of export contracts worth over EUR 70M across 11 countries in Africa and the Middle East, including Zambia, Namibia and tenders in South Africa, running up to 3 live contracts in parallel alongside new bids.
- Maintained zero missed contractual delivery deadlines over 6.5 years; shortest tender-to-delivery cycle was 3 months, with annual contracts running monthly shipments.
- Resolved a product quality incident on a delivered shipment: ran the on-site inspection with a technical specialist, identified the root cause, secured a full replacement at company cost and relocated production to a different plant, closing the case in two weeks.

Contract Economist, Contracts Department

Goznak, Saint Petersburg Paper Mill | April 2015 to July 2017

State manufacturer of banknote and security paper.

- Reviewed contracts, amendments and supporting documents for compliance with corporate policy and national legislation, and maintained the contract register.
- Checked tender and procurement documentation prepared by the site.

Key achievements

- Processed 600+ contracts and amendments per year.
- Checked approximately 40 tender documentation packages within six months with no findings from supervisory authorities.

Earlier career

Lead Economist, Vyborgskaya CHP Plant (TGC-1), Saint Petersburg | September 2013 to April 2015

Combined heat and power plant within TGC-1, a regional power generation company. Primary documentation for non-core operations, management reporting, payment control.

Economist, VAM LLC, Saint Petersburg | February 2013 to June 2013

Agricultural producer. Company budget and cash flow budgeting, bank reporting on credit facilities, contract preparation.

Selected Projects

"Goznak.Processes", product proposal to the executive project committee, 2025

Authored a product proposal for a SaaS production-monitoring application for mid-size serial manufacturers: Gantt visualisation of production and maintenance, dashboards, reporting module, bottleneck highlighting, automated delay-risk alerts and an AI agent for production forecasting. Owned the full business case: problem definition and target segments, 7P competitive benchmark against four rivals, market sizing (TAM RUB 85bn, SAM RUB 21bn, SOM RUB 850M), subscription monetisation model, financial model (RUB 56M investment, 20% IRR, 6-year payback, NPV RUB 3.9M) and a 13-month delivery roadmap. Presented to the executive board including the CEO, deputy CEOs and the R&D institute director.

Cross-functional e-commerce product, Yandex Practicum capstone, 2023

Led a fully remote 12-person cross-functional team of recent graduates (2 project managers, 2 designers, 4 to 5 backend and 4 to 5 frontend developers) with no prior working relationship and no compensation. Built the collaboration process between design, frontend and backend from scratch, managed approximately 130 tasks in Jira with weekly ceremonies, resolved cross-role conflicts over dependencies, and delivered a working e-commerce site with catalogue, cart and checkout flow within two months. Project defended successfully.

Skills

Delivery and project management: project and delivery management, vendor and subcontractor management, schedule and risk control, escalation management, acceptance and handover, government contract stage closure, management reporting

Business analysis and process: requirements gathering, functional and technical specifications, business process modelling (BPMN), legacy system analysis, process design and regulation, reference data and naming standards

Leadership and communication: cross-functional team leadership, stakeholder management up to C-level and government department directors, international negotiations in English, training and enablement, public speaking

Tools: Jira, Eva Project (enterprise task management), BPMN (draw.io), Miro, Figma (viewer), MS PowerPoint, MS Excel, MS Dynamics AX, DocsVision

Education

Saint Petersburg State University of Economics and Finance | Specialist degree, Economics and Management (Organisational Management), 2013, Top-20 economic universities in Russia, leading economics and finance institution in Saint Petersburg.
