Project / Delivery Manager | Enterprise and Government Systems | Vendor Management

PROFESSIONAL SUMMARY

Project and Delivery Manager with 13 years of professional experience, including 2.5+ years delivering government IT systems through external vendors and 6.5 years managing international B2G supply contracts, from tender through production control at paper mills, printing works and mints to final delivery. Owns scope management, schedule, budget, risk management and change control end to end, from requirements to acceptance, as the single point of contact between client executives and delivery teams. Delivered three Ministry of Finance IT products with zero revision cycles, saved $120k in six months by replacing an external vendor with an in-house team, and managed EUR 70M+ in export contracts across 11 countries with zero missed deadlines. Applies Agile methodologies (Scrum) and Waterfall; works in English with central bank and ministry leadership.

PROFESSIONAL EXPERIENCE

Acting Head of Department, Enablement and Competence Development

Goznak (IT Centre Gosfinansy) | Moscow, Russia | Aug 2025 – Oct 2026

IT arm of Goznak, developing "Electronic Budget", the national public finance platform used by all federal ministries (500,000+ users). Client: Ministry of Finance.

- Built and led an in-house service delivery team of three direct reports, replacing an external vendor; set priorities and delegated work across user documentation, university partnerships and professional education programmes.
- Owned the enablement content pipeline end to end: intake of requests from platform owners, conversion of 300-page user manuals into concise step-by-step guides, quality control and delivery against contractual SLAs.
- Closed government contract stages, prepared management reporting, status briefings and executive presentations.

Key achievements

- Led change management to transfer production of user training content from an external vendor to an in-house team, reducing spend by approximately $120k over six months against a $324k vendor contract at the same volume of work.
- Delivered 61 training assets in 2026 for new platform releases; the learning portal reached 40,000 unique users and 92,000 course views.
- Outperformed contractual delivery SLAs by roughly 2x: 2.5 days average for updates against a 5-day requirement and 5 days for new materials against 10 days.

Lead Business Analyst / Project Manager

Goznak (IT Centre Gosfinansy) | Moscow, Russia | Feb 2024 – Aug 2025

- Acted as delivery lead and single point of contact between the government client and subcontractor teams building analytics and monitoring products on the national public finance platform.
- Gathered requirements from the client, analysed legacy systems, rewrote technical specifications with vendor analysts and validated delivered functionality.
- Managed scope and change control with subcontractor teams: ran regular vendor check-ins, managed escalations and client expectations when delivery was at risk, and mediated between client and vendor on scope and timelines.

Key achievements

- Delivered two analytics modules for the capital investment and public debt subsystems of the national public finance platform: 9-month cycle, Waterfall, 10-person subcontractor team. Modules now serve approximately 200 and 50 users respectively.
- Delivered MF-Monitoring, the Ministry of Finance internal milestone-tracking system used by project offices and by the Minister of Finance: 10-month cycle, 5-person subcontractor team, up to 150 users. Secured the IT Director’s approval of the design and solution before full implementation.
- All three products accepted with zero revision cycles and all contract milestones met.
- Formally recognised by the Director of the IT Department of the Ministry of Finance (2024) for contribution to the development of state information systems, and by the Director of the Centre (2025).

Senior Specialist, Export Directorate

Goznak | Moscow, Russia | Jul 2017 – Jan 2024

- Owned the full export cycle, from tender screening and bids to contracting, production and delivery; negotiated in English with central banks, ministries and plant directors.

- Coordinated production across paper mills, printing works and mints, escalating directly to chief technologists, workshop heads and plant directors when timelines were at risk.

Key achievements

- Managed a EUR 70M+ portfolio of government contracts across 11 countries in Africa and the Middle East, running up to 3 contracts in parallel with zero missed delivery deadlines over 6.5 years; won ~50% of 20+ international tenders for central banks and ministries.
- Led problem solving for a product quality incident on a delivered shipment: ran the on-site inspection with a technical specialist, identified the root cause, secured a full replacement at company cost and relocated production to a different plant, closing the case in two weeks.

Earlier career

Contract Economist | Goznak (Saint Petersburg Paper Mill) | Saint Petersburg, Russia | Apr 2015 – Jul 2017
Contract and tender documentation review.

Lead Economist | Vyborgskaya CHP Plant (TGC-1) | Saint Petersburg, Russia | Sep 2013 – Apr 2015
Management reporting and payment control.

Economist | VAM LLC | Saint Petersburg, Russia | Feb 2013 – Jun 2013
Budgeting and cash flow planning.

SELECTED PROJECTS

"Goznak.Processes", product proposal to the executive project committee, 2025
Authored a product proposal for a SaaS production-monitoring application for mid-size serial manufacturers: Gantt planning, dashboards, delay-risk alerts and AI forecasting. Owned the full business case: competitive benchmark, market sizing (TAM $1.02bn, SAM $252M, SOM $10.2M), financial model ($0.67M investment, 20% IRR, 6-year payback, NPV $47k) and strategic planning with a 13-month delivery roadmap. Presented to the executive board including the CEO and deputy CEOs.

Cross-functional e-commerce product, Yandex Practicum capstone, 2023
Led a fully remote 12-person cross-functional team of recent graduates (2 project managers, 2 designers, 4 to 5 backend and 4 to 5 frontend developers) with no prior working relationship and no compensation. Applied Agile methodologies (Scrum): built the collaboration process between design, frontend and backend from scratch, managed approximately 130 tasks in Jira with weekly Scrum ceremonies, resolved cross-role conflicts over dependencies, and delivered a working e-commerce site with catalogue, cart and checkout flow within two months. Project defended successfully.

SKILLS

Project & Delivery Management: Agile methodologies (Scrum), Waterfall, project planning and coordination, strategic planning, risk management, change management and change control, scope management, schedule and time management, budget management, stakeholder management, task delegation, escalation management

Business Analysis & Processes: requirements gathering and analysis, functional and technical specifications, business process modelling (BPMN), business process improvement, legacy system analysis, reference data and naming standards
